

OUR WEATHER: **MANIPULATED** TOXIC CLANDESTINE GEOENGINEERING

- Have you noticed a change in the weather in recent years?
- Do you think food prices have increased disproportionately?
- Have you noticed an increase in allergies, dementia and respiratory illness?
- **HAVE YOU LOOKED UP AND SEEN THE STRIPES IN THE SKY – TURNING INTO HAZE?**

We believe all these issues are linked to something called geoengineering. The United States government and other global corporate interests with their scientist **SAY THAT IN THE FUTURE** they want to spray chemicals into the sky from aircraft jet trails for climate forcing, which is weather modification on a global scale. Have you ever noticed long persistent jet trails that sometimes leave grid patterns and X's in the sky? We never saw these years ago. These trails expand to form man-made clouds, that turn into a haze that covers the whole sky, which blocks out our sunshine. This phenomenon is officially called "global dimming".

The problem is that the chemicals being proposed are highly toxic, such as aluminum, barium, strontium and others. These chemicals are linked to illnesses such as cancer, Alzheimer's, autism, MS and other serious conditions.

It's not just humans being affected; the UK Forestry Commission warns that our plants and trees are suffering too. If you closely inspect the leaves, you are likely to see signs of stress, such as: discoloration, spots and deformities. Our crops are suffering too. Politicians and corporations are pushing for dependency on GMO synthetic alternatives to natural foods. Food prices are also set to soar and a few large corporations want to dominate the world's food supply using GMOs.

Environmental test samples world-wide indicate that geoengineering chemicals are being found in excessive quantities **CONFIRMING THAT THE GEOENGINEERING PROGRAMS ARE WELL UNDERWAY.** There has been **NO PUBLIC CONSULTATION AND WE HAVE NOT GIVEN OUR CONSENT.** However, government concedes in their own documents that the public can stop this clandestine program if we act. **CAN WE COUNT ON YOUR SUPPORT TO ADDRESS THIS SERIOUS HEALTH PROBLEM?**
